Respected Sir,

Healthcare is the lifeline for a nation's well-being and is governed by the availability of infrastructure and innovations. With pandemic creating unprecedented pressure on healthcare delivery across the country, the government push for an integrated digital health infrastructure is a welcome step.

Both state and central governments need to bridge the existing gap amongst different stakeholders of the healthcare ecosystem through digital highways and build a resilient platform that can mitigate any future challenges.

Join us in the special panel discussion with top health sector leaders from the public sector to learn their experiences and what they are doing to build resilient healthcare infrastructure
