Dear All,

You are cordially invited for the following event:

Topic: Sustainable Living: Green Elections 2024
Venue: Senate Hall
Date: May 27, 2024 (Monday)
Time: 12 PM - 1 PM
Speaker: Dr. Heera Lal (IAS)

[The event will be followed by a plantation drive.](#)

About the Speaker: Dr. Heera Lal Patel, an Indian Administrative Service (IAS) officer, is renowned for his innovative approaches to governance and environmental sustainability. Recently, he spearheaded a "green election" initiative in the Anandpur Sahib parliamentary constituency. This initiative aims to make elections more environmentally friendly by reducing the use of plastic and promoting eco-friendly materials. As the General Observer in Anandpur Sahib, Dr. Heera Lal emphasized minimizing plastic waste and encouraging the use of biodegradable materials throughout the election process. His efforts are part of a broader vision to create sustainable and eco-conscious practices within governmental operations.

This green election drive is an extension of his earlier successful environmental campaigns, such as making Banda a plastic-free district and promoting extensive tree plantations under the "Oxygen Park" project. His holistic approach combines water management, waste reduction, and the use of sustainable alternatives, significantly impacting local communities. Dr. Heera Lal's initiatives are part of his broader mission to foster sustainable development and good governance through community participation and innovative solutions.

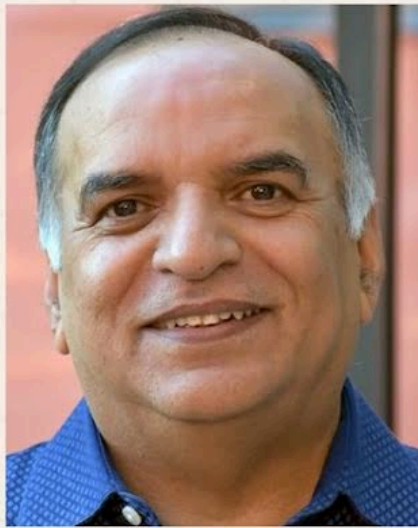

Sustainable Living

Green Elections 2024

Dr. Heera Lal (IAS)

**General Observer
Anandpur Sahib Consituency**

Prof. Rajeev Ahuja

Director, IIT Ropar
